

Why Choose Hydro-Park

TUV certified *Hydro-Park* Series Two Post Parking Lift

VS

Competitors' two post parking lift

Dynamic anti-falling lock system ensures platform safety during movement all the way.

VS

Two position locks only stop platform in the top.

24V electricity safety operation panel

VS

Operation and control system both in one box, cannot secure the operator from electric shock

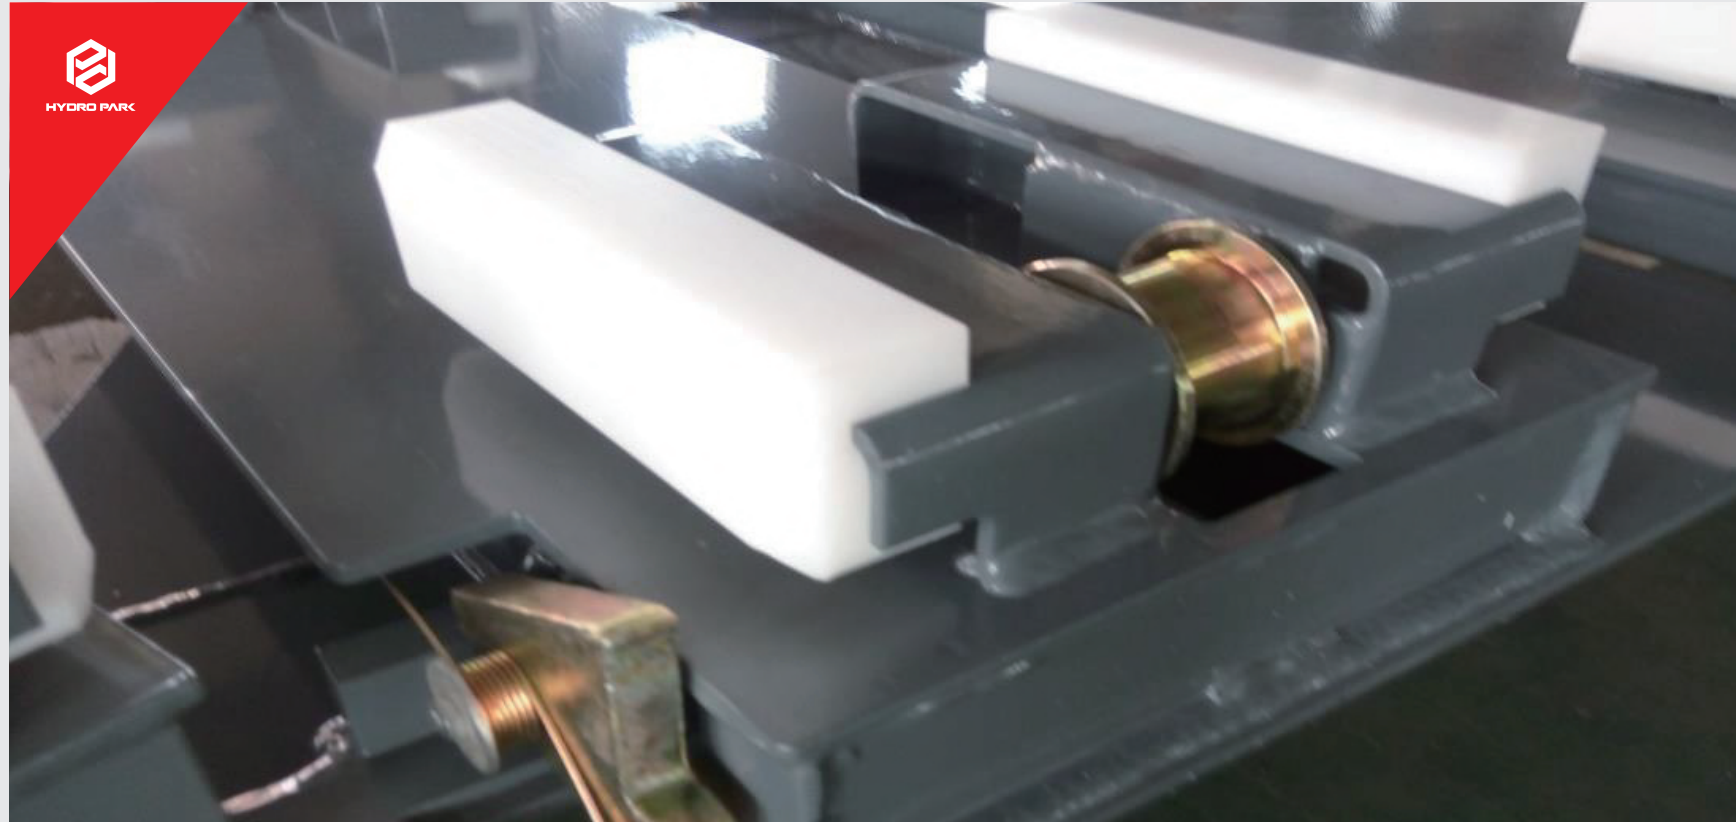

Unique structure design secures the safety for vehicles back in, and make front doors open easily

VS

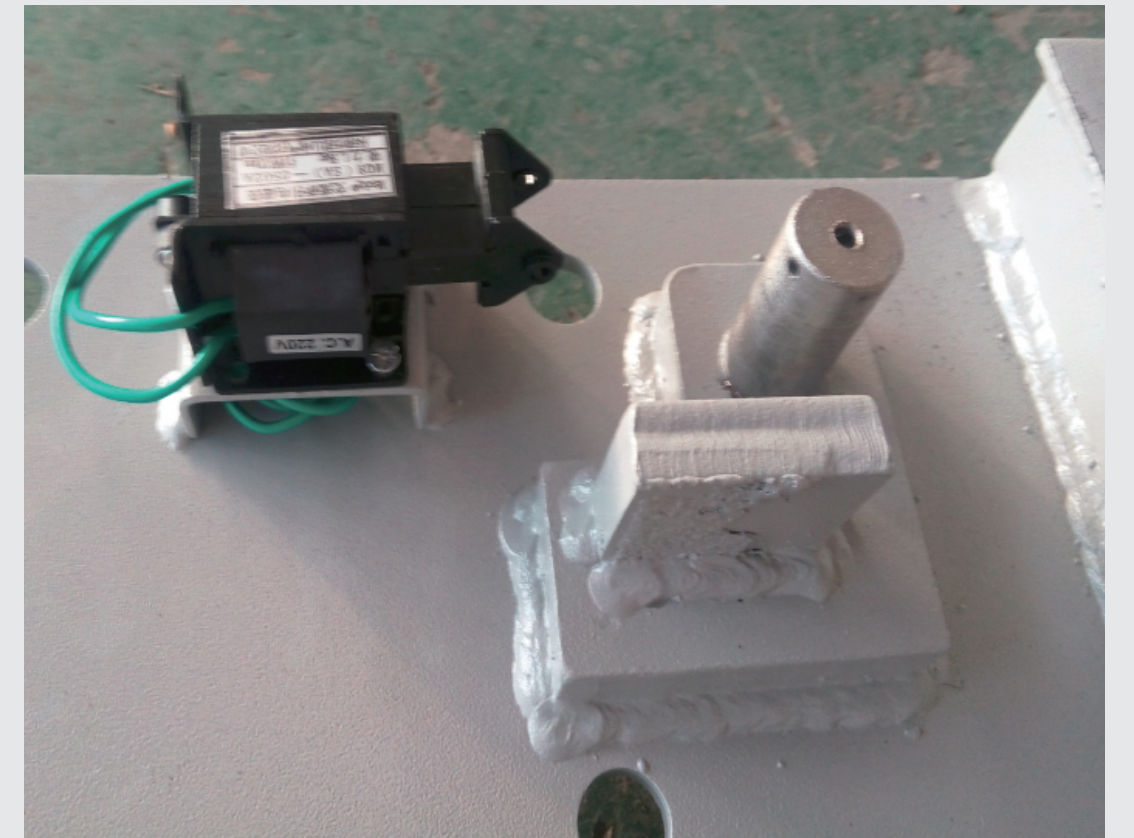

It's difficult to open driver's door if vehicle head in

Partly fabricated by laser cutting and robotic welding,
All cutting and welding work is carefully and
professionally done.

VS

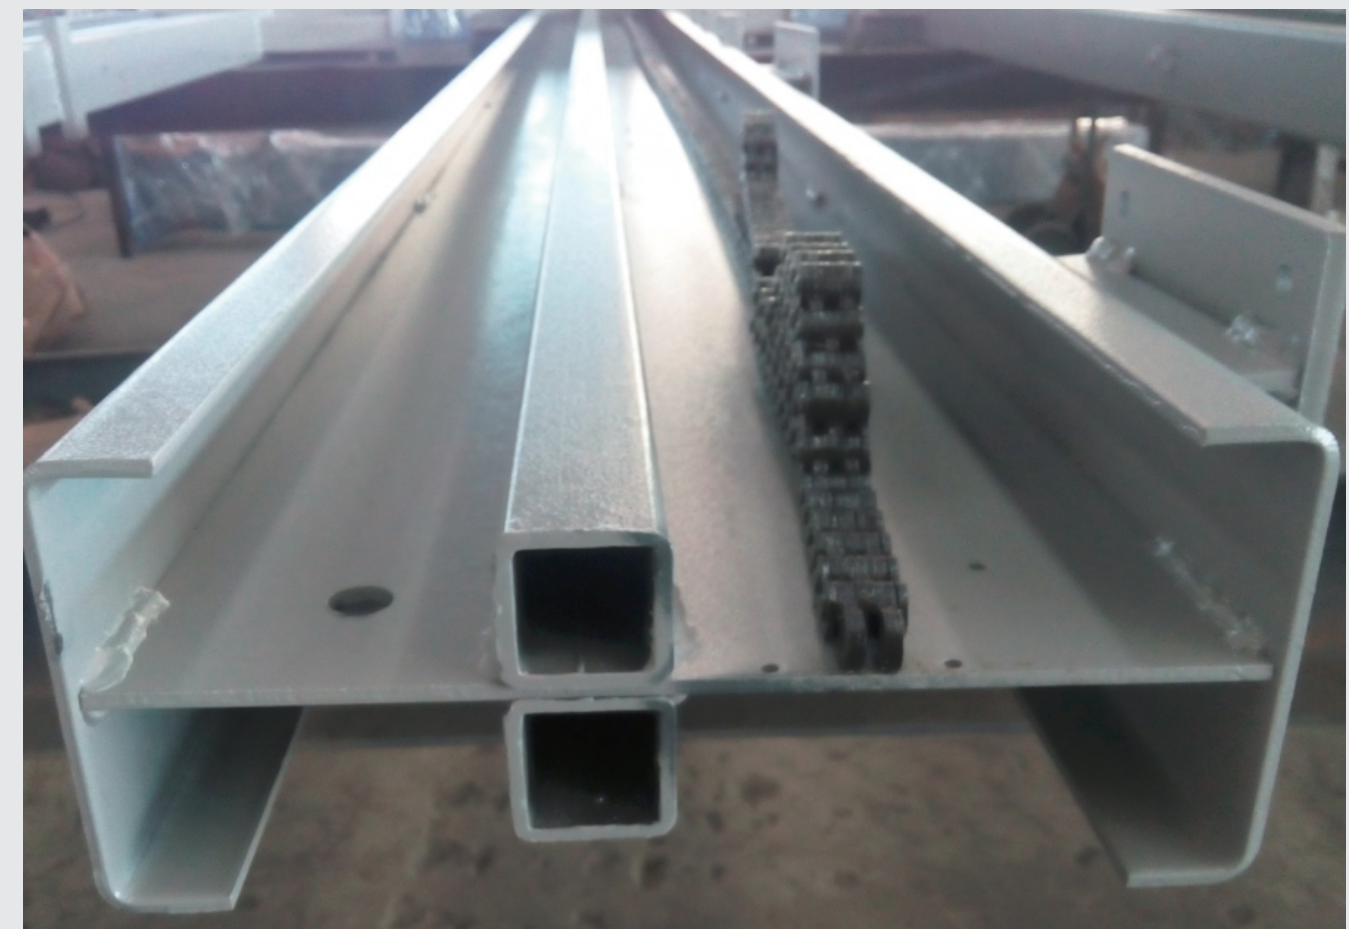

Bad cutting and welding work

High quality color powder and plenty thickness makes surface glossy and beautiful

VS

Low quality powder with less thickness

Professional packages always protect products from damage during long time shipping and unloading work

VS

Simple package
